Copeia, 2006(3), p. 558

Ollotis Cope, 1875 is the Oldest Name for the Genus Currently Referred to as *Cranopsis* Cope, 1875 (Anura: Hyloides: Bufonidae)

DARREL R. FROST, TARAN GRANT, AND JOSEPH R. MENDELSON, III

Frost et al. (2006) recently published an extensive systematic revision of all amphibians, resulting in many name changes and taxonomic realignments. Unfortunately, one nomenclatural oversight has already been noted. *Cranopsis* Cope, 1875 (Bufonidae; type species *Cranopsis fastidiosus* Cope, 1875) is a primary homonym of *Cranopsis* Adams, 1860, a mollusk, and *Cranopsis* Dall, 1871 (a brachiopod). Cope (1889:260) recognized this himself and provided *Cranophryne* as a replacement name for his *Cranopsis*. However, *Ollotis* Cope, 1875 (type species: *Ollotis coeruleus* Cope, 1875 [= *Cranopsis fastidiosus* Cope, 1875]) is also at play, and this is the oldest available name for the genus referred to by Frost et al. (2006) as *Cranopsis*. The gender of *Ollotis* is feminine.
